

# IN LYNNFIELD

# STORMWATER MATTERS

## Are you polluting our stormwater?

**Bag all pet waste and dispose in the trash.**

Pet waste can contaminate our waterways when not properly disposed of.

**Minimize the amount of fertilizer you use on your lawn.**

Heavy use of fertilizers can promote algae growth in our wetlands and waterways and damage wildlife.

**Don't dump waste into our drains.**

Pollution from these drains flows into wetlands and waterways untreated.

**Control construction site runoff.**

The runoff from these locations contain oil, sand, and silt that pollute our wetlands and waterways.

You can do your part in protecting our natural resources'. To learn more, please visit [http://www.town.lynnfield.ma.us/Pages/LynnfieldMA\\_DPW/stormwater](http://www.town.lynnfield.ma.us/Pages/LynnfieldMA_DPW/stormwater)

This message brought to you from the Lynnfield Department of Public Works.
